The connected world – cell phones

- Global number of phones
 - 7.9 billion mobile phones globally
 - 7.6 billion people
- USA
 - 328 million phones
 - 318 million people

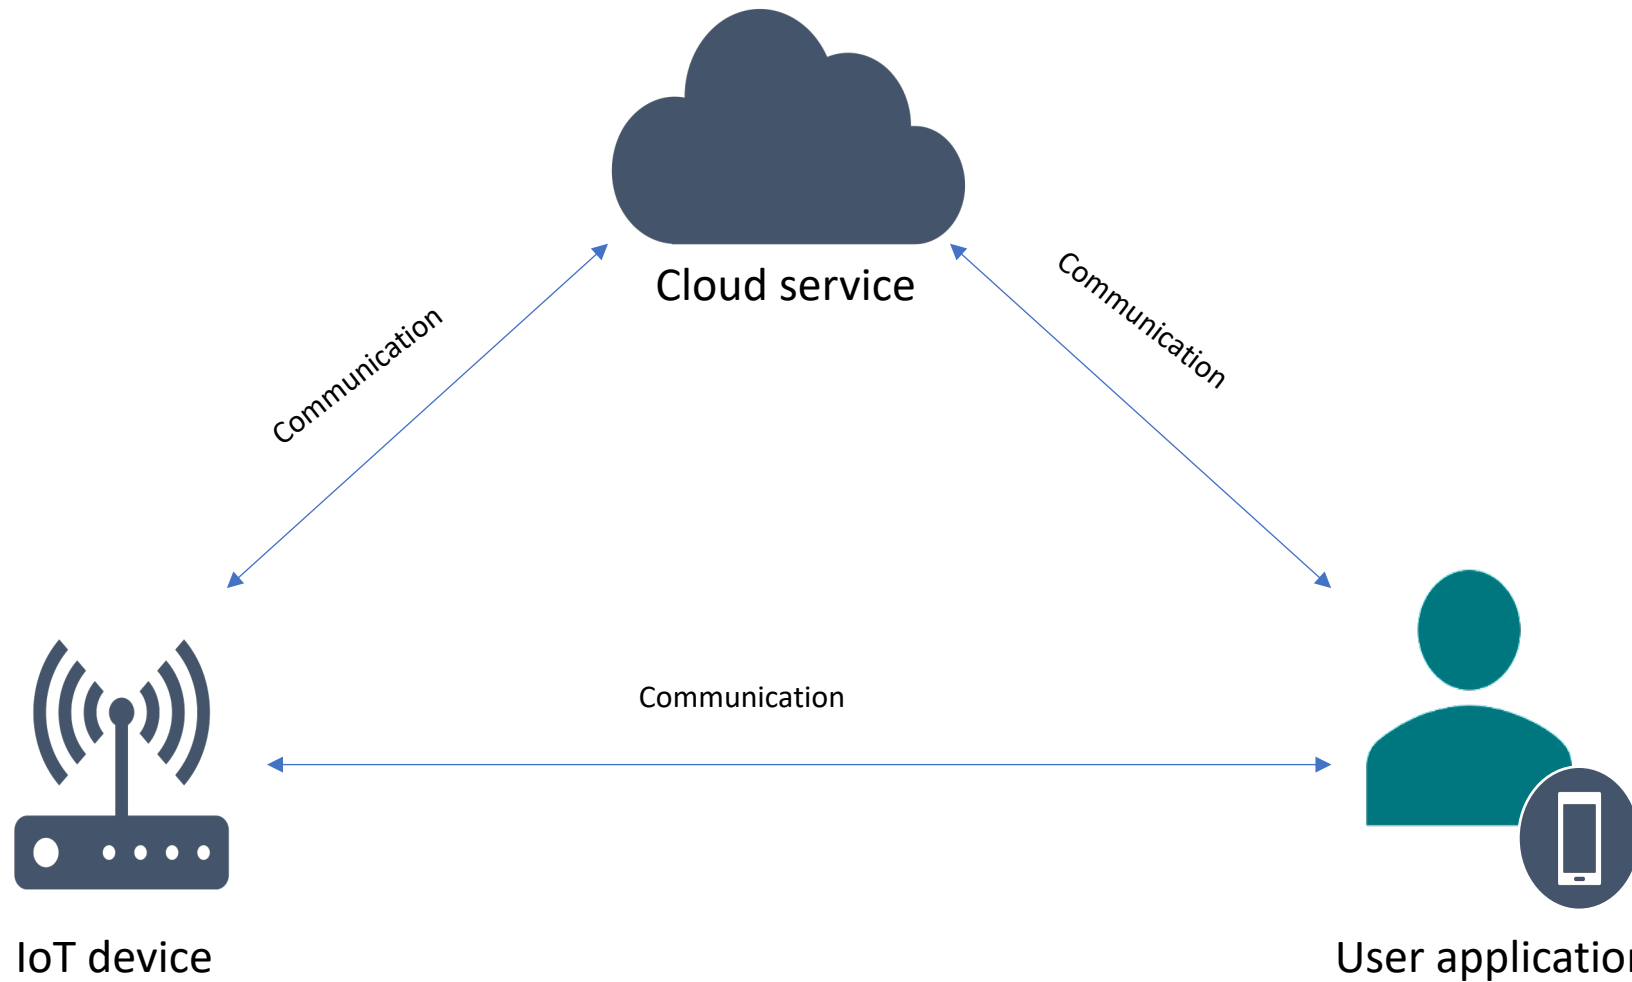

The connected world - devices

- 2020 – 31 billion IoT devices
- 2021 – estimated 35 billion
- 2025 – predicted 75 billion

The Internet of Things

How IoT devices (typically) work

Why target IoT?

- Always on
- Always connected
- Malware is hard to detect, analyze and remove
- Less sophisticated
- Computing power is increasing

Is there a risk?

- Accessing and controlling your device
- Abusing the device
- Collecting personal data
- Over or inadvertently sharing

Is there a risk?

Abusing the device

CSO

The Mirai botnet explained: How teen scammers and CCTV cameras almost brought down the internet

Mirai took advantage of insecure IoT devices in a simple but clever way. It scanned big blocks of the internet for open Telnet ports, then attempted to log in default passwords. In this way, it was able to amass a botnet army.

Oversharing

- Wake up at 7 AM – connected coffee machine
- Stream music while showering
- Book a table or order takeout for lunch
- Get directions to the tennis courts
- Drive through a smart toll booth
- Track your fitness playing tennis

Inadvertently sharing

Digital/Home assistants

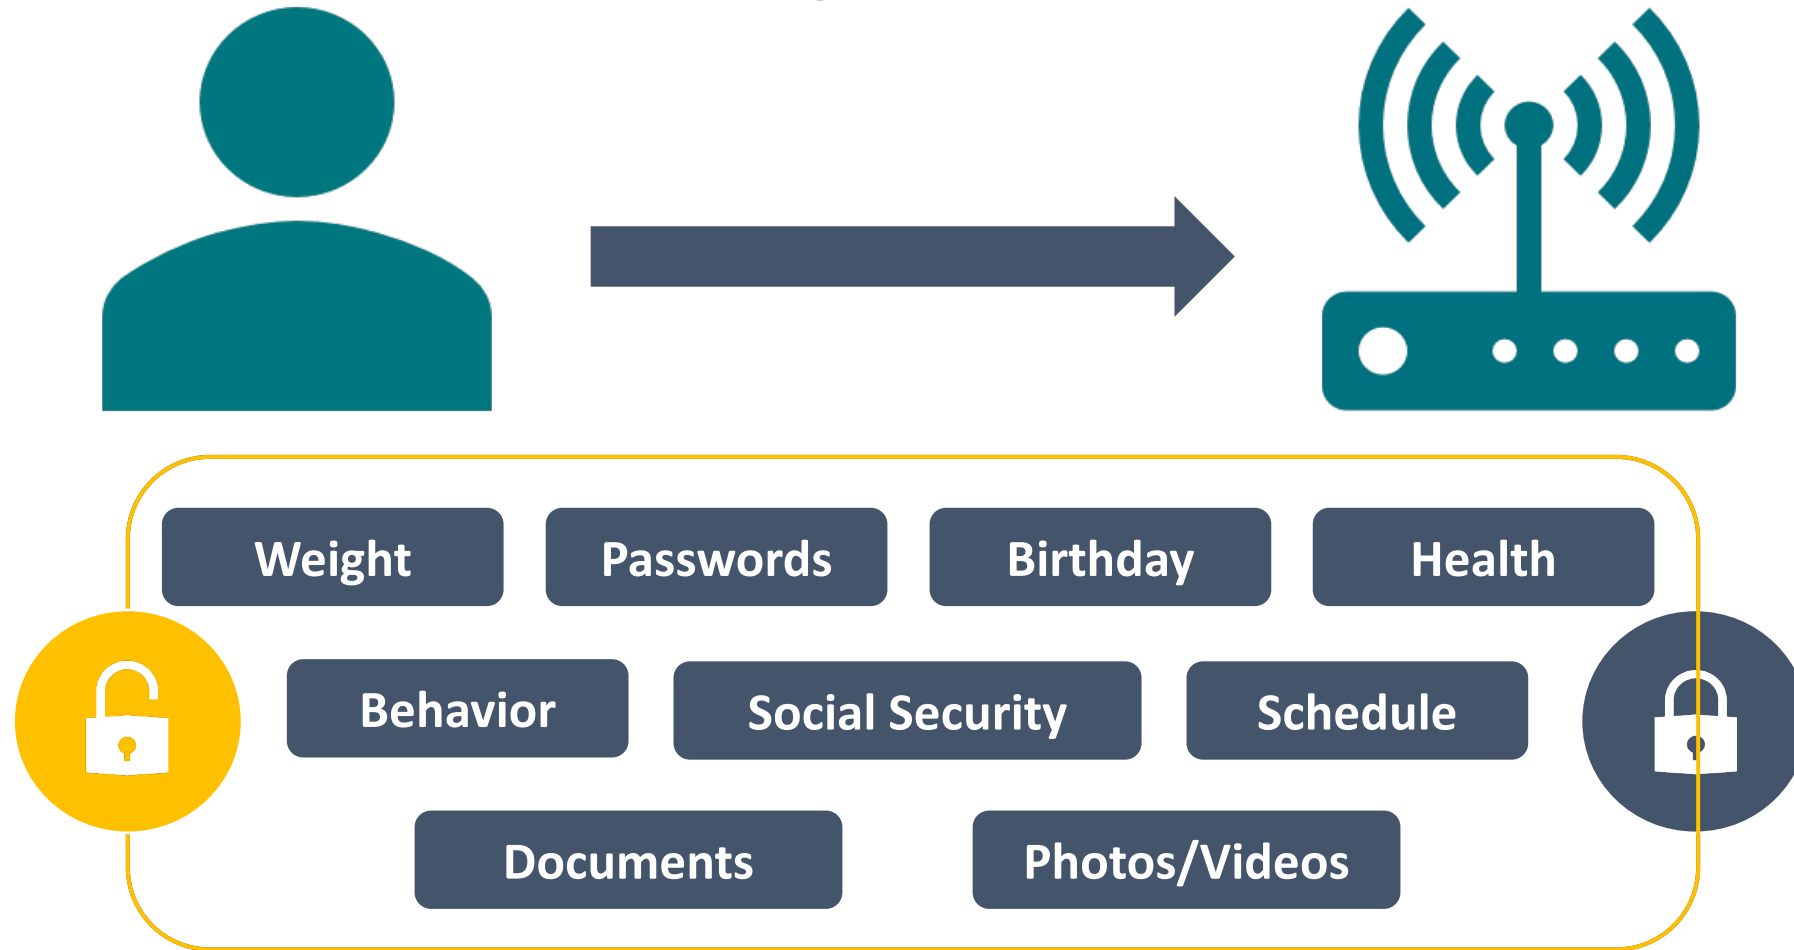

Home/Digital assistants

- Very secure
 - Forces user to set password
 - Automatic updates
 - Strong encryption
- Privacy concerns

Privacy Concerns

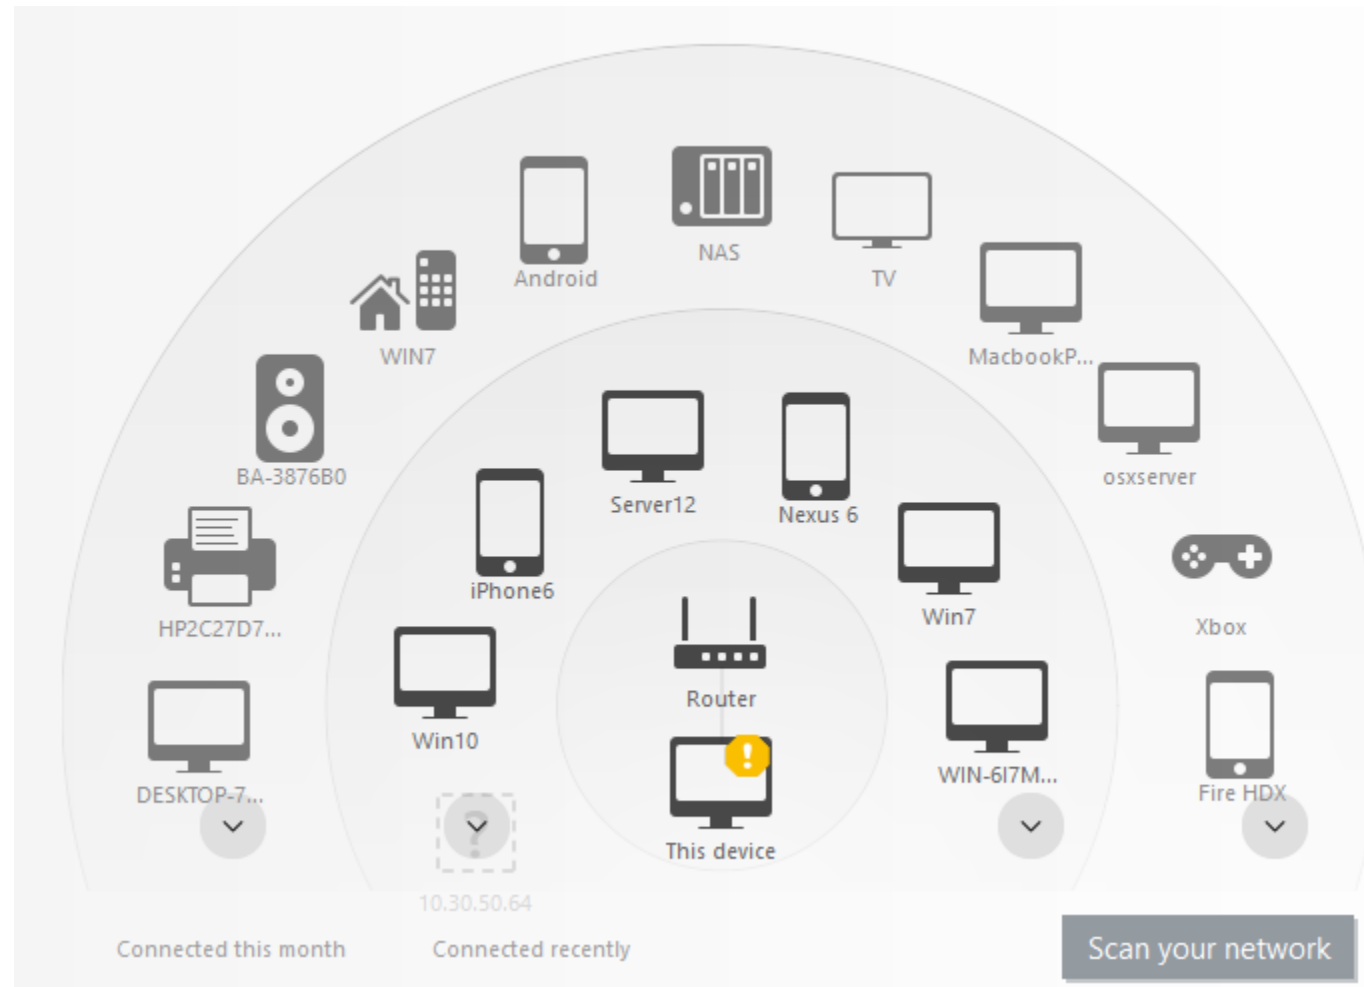

Identity Theft

- Someone uses your Social Security number or other personal information to assume your identity in order to commit fraud or other criminal acts.
- 60 million Americans have been affected by identity theft—according to a survey by The Harris Poll

Know what's connected

Investigate the device

RT-N18U-AEC4 

Router

Last seen: 2 minutes ago

Network: 192.168.1.1

IP address: 192.168.1.1

MAC address: 88:63:83:44:55:66

Operating system: Linux

Open web interface

 **Open network services** 

Your router runs network services that may be exploited by others. This can be due to poor configuration or a compromised router.

Check your router's configuration. [Learn more](#)

Port: 23,
Service: TELNET,
TCP,

 Details

 **Network services** 

Your router runs common network services. These are needed by the network and are probably safe.

View your router's configuration. [Learn more](#)

Port: 139,
Service: SMB 3,
TCP,

Port: 445,
Service: SMB 3

Fix what's connected

- Use strong password
- 2FA where possible
- Periodically update firmware
- Enable encryption
- Disable unused services
- Search up the vendor/device vulnerabilities
- Install security software – when available

PRiVACY

A hand holding a white marker is shown underlining the word 'PRiVACY'. The word is written in a large, black, sans-serif font. The underline is a thick black line that starts under the 'P' and ends under the 'Y'.

Regulation & Certification

Certification

Regulation

- Reasonable security features
 - Appropriate to device
 - Appropriate to function
 - Designed to protect itself
- Authentication
 - Unique password out-of-box
 - Require immediate change

Security of connected devices

- Vulnerability policy/contact
- Software updates
- Secure storage – credentials and data
- Communicate securely
- Easy deletion

Before you purchase or connect

- Research the device for vulnerabilities
- Check the vendor updates their software
- Read the privacy policy
- Limit sharing
- Don't tell your assistant everything

Thank you for attending
